ing a great risk, and one that should never be even thought of. There are none who will deny that this was not against all sound business policy.

Now by next summer the water consumption will have increased to such an amount that the present supply will not begin to meet the demand. Then what is to be done?

Additional wells, together with a water tower, can only be supplied through a bond issue. It is a condition and not a theory that confronts us. Will you think, and think seriously of these matters, and when the day of the election comes discharge your duty, having in view nothing but what your judgment dictates to be for the best interests of the city?

Owing to the short time before the change in our national administration, President Taft has wisely decided to leave the appointment of an ambassador to the court of St. James to succeed the late Whitelaw Reid, to President Wilson. It is not an easy matter to find a suitable man to fill our important ministerial positions, and they have to be selected with great care.

The trouble on the Harriman lines between the roads on one side and the conductors and trainmen on the other, has been settled. This is cause for rejoicing to the citizens of Bryan and every other town and city located on this great system.

Woodrow Wilson had no turkey for his Thanksgiving dinner in Bermuda. He is now back in God's country and his Christmas table will be graced with the finest gobbler in the land.

Christmas shoppers should make hay while the sun shines.

At a recent wedding a baby shrieked without intermission, to the great annoyance of the guests, etc. As the bridal party was leaving the church a slight delay occurred. One of the guests seized the opportunity to say to the bridesmaid:

"What a nuisance babies are at a wedding!"

"Yes, indeed!" answered the bridesmaid, angrily. "When I send out the invitations to my wedding I shall have printed in the corner, 'No babies expected.'"

## THE MOST SENSATIONAL

**SLAUGHTER SALE**

We have decided to put our entire stock of Ladies', Men's and Boys' Wearing Apparel in this sale. The success of business is to turn stock over as often as possible—the only way to accomplish it is to put stock on sale in time, at the right price, when the people are really needing the merchandise. Waiting until the season is over is absolutely no benefit to the public as goods are never too **CHEAP** WHEN YOU DON'T NEED THEM. Therefore, we will give the public the benefit of buying their winter goods at a time when they really can make use of them and save one-half of the price.

**THE PROPOSED BOND ISSUE.**

The time for the election on the question of issuing bonds for paying Main street, and for improving the water system, is drawing near, January 7 being the date. The object of

The Eagle in calling attention to the matter is to urge the people to give the question the serious consideration it deserves. Many are inclined to treat the matter lightly, when in fact but few, if any, propositions were ever put up to the people of this city of equal importance to this one.

The bond issue is dual in purpose—to pave Main street and improve the water system. It is not necessary for The Eagle to stress the extreme importance of both. It occurs to us that a mere mention of the purposes of the bond issue would be sufficient to cause every voter who has the welfare of the city at heart to cast his ballot for the measure.

Main street is in a deplorable condition. The crushed rock put on the street a number of years ago is gone, and the dirt and dust have accumulated on it until it is now several inches deep in mud every time it rains, and during long wet seasons it is simply terrible. Not only that, but during the dry, windy seasons the dust is almost unbearable, and no amount of sprinkling will keep it down. Paying would do away with both of these abominable nuisances, to say nothing of the comforts, conveniences and appearance of a neatly paved street.

Just a word in regard to improving the water system. Last summer the city completely exhausted its water supply and deep encroachments were made on the reserve kept in the reservoir for fire purposes. This was tak-
